

PATREON

About Patreon

Patreon is a creator-founded membership platform for artists and their most passionate fans.

We help creators support their work through direct fan membership, so they can afford the freedom to do their best work, and the stability to build an independent creative career. In turn, fans get a chance to get access to community, exclusive content, and the chance to become active participants in the work they love.

Our end-game? A new creative economy that's changing the way art is valued. When fans can be more than followers, artists can finally get rewarded for the impact they have on our lives.

Quick Facts

- Patreon is home to over 200,000 creators, supported by 6+ million active patrons.
- As of mid-2020, creators have earned more than \$2B since Patreon's inception in 2013.
